Precipitation probability					
40%	50%	60%	60%	60%	60%

Forecast for Monday 02 Nov 2020

Weather: A cloudy wet start. The rest of the day will be a mixture of sunshine and blustery showers, some of the showers will be heavy and some hail or thunder cannot be ruled out particularly in the late afternoon period. Winds will be gusty around the showers.

Chance of cloud free mountain/hill tops above 800m: At first cloud will be extensively over the fell tops with a base around 2-300m. However after dawn it will lift and break with patches covering fell tops at times, main cloud bases will be above the tops but patches around 600m during the day especially around showers, chance of cloud free hill tops around 60%.

Visibility: Generally good or very good out with showers, falling moderate or poor in heavier showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Still a windy day with some gusts around the fell tops near gale force in the morning. Notice that freezing level drops during the day, so it will be a much colder feel by the afternoon. Showers later in the evening may turn wintry near the fell tops.

Forecast for Tuesday 03 Nov 2020

Weather: Showers overnight may be wintry on the fell tops. During daylight hours it is likely to stay showery with a risk of hail and thunder at times. Some bright or sunny intervals between showers too. During the afternoon showers may cluster together to give longer periods of rain.

Maximum wind: Westerly winds 20-25mph at dawn will ease to around 10-15mph by mid afternoon.

Chance of cloud free mountain/hill tops above 800m: 70% chance of cloud free tops, in heavier showers cloud may shroud the fell tops down to 500m for a time.

Visibility: Good or very good out with showers becoming poor or very poor in any wintry or thundery showers.

Temperature: **Valleys:** Plus 6 rising to 10 Celsius.
At 800m: Plus 1 Celsius
Freezing level: Around 900m
